Environment Design Group is a landscape architecture firm located in the historic Paramount Building in the heart of Palm Beach. We are a full-service firm specializing in residential garden design, with a focus on creating outdoor spaces that are both functional and beautiful.

Our work is guided by a deep appreciation for nature and a sincere desire to enhance the way people live and connect with their surroundings. From the earliest stages of concept development to the final implementation of a garden, we walk

alongside our clients through each step of the process, offering guidance, collaboration, and care.

We consider it a privilege to shape landscapes that become meaningful parts of people's daily lives. Every project is a chance to listen, learn, and contribute something lasting to the community. We are humbled by the trust our clients place in us and grateful to do work that connects creativity with stewardship. Designing gardens is not just our profession—it's our passion and purpose.
